*** Notes of Significance ***

Fires highlighted in yellow have submitted a FINAL ICS-209 or will no longer meet criteria to be prioritized

[illegible]

Evening Brief

Date: Friday September 11th, 2020

Weather Summary

***** Warmer and Drier with Increasing Winds by Monday *****

High pressure builds across the west and into the Great Basin through the weekend, with normal late summer warmth and dryness returning to eastern Idaho, Utah, the AZ Strip and eventually to western Wyoming by this weekend.

By Sunday, the leading edge of a Pacific Northwest low will begin to approach the region. Its initial effects will be increasing southwest winds, along with continued warm and dry conditions across western Nevada and Idaho Sunday, spreading eastward into the rest of the Great Basin early next week. At some point next weekend there could be some showers from this front that move through the Great Basin, but long range models are uncertain at this time.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 5	New Fires and Acres: 8 fires for 13.2 acres. 15, 045 Large Fire Acres

Fuels/Fire Potential

***** A Fuel and Fire Behavior Advisory is in Effect for Eastern Nevada, Most of Utah and the Western Arizona Strip will be expanded north into Western Idaho *****

Fuels are in a temporary state of flux right now over eastern areas of the Great Basin. 2 days of wetting rains (and snow) across eastern areas will continue to moderate fire danger Friday. Further west, across western parts of Idaho/Utah and most of Nevada, the weak moistening and cooler temperatures have had minimal to no effect. These areas like western Idaho and Western Nevada have seen fuels steadily dry the past 2 days, along with an increase in activity from existing large fires. These ongoing fires will continue to see favorable burning conditions thru the weekend into early next week.

It is uncertain how existing fires over eastern areas will react to the drying trend, due to the prolonged period of cool, moist conditions, but fuels by the end of the weekend should approach critically dry levels in many of the eastern areas of Utah and Idaho as well.

Resources:

Aviation within the Great Basin

- 0 VLAT, 4 LATs, 0 CL-415
- 25 SEATs, 0 FB, 11 AA, 0 ASM, 1 LP
- 9 Type 1 Helicopters / 9 Comm.
- 10 Type 2 Helicopters / 9 Comm.
- 21 Type 3 Helicopters / 15 Comm.

Crews Committed within the Great Basin

- 13 IHCs / 0 Available
- 13 Type 2IA / 0 Available

Current Incident Details
